

NI 43-101 Technical Report on the Pilbara Lithium Project (Demo Sample)

Project: Pilbara Lithium Project (Demo)

Company: Demo Lithium Pty Ltd

Effective Date: March 31, 2025

Report Date: May 15, 2025

1 Summary

This technical report has been prepared in accordance with National Instrument 43-101 Standards of Disclosure for Mineral Projects. The Mineral Resource estimate for the Pilbara Lithium Project (Demo) is reported within a conceptual pit shell at a cut-off grade of 0.5% Li₂O. Mineralisation is hosted in stacked pegmatite bodies with a strike length of approximately 3.2 kilometres.

2 Mineral Resource Statement

The Mineral Resource estimate for the Pilbara Lithium Project (Demo) is summarised in Table 2.1. Mineral Resources are reported at a cut-off grade of 0.5% Li₂O using a lithium oxide (Li₂O) grade basis.

Table 2.1 - Mineral Resource Statement (Demo)

Category	Tonnes (Mt)	Li ₂ O Grade (%)	Contained Li ₂ O (kt)
Measured	18.2	1.31	238
Indicated	52.4	1.12	587
Measured & Indicated	70.6	1.17	825
Inferred	34.8	0.94	327

Notes: (1) Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability. (2) Tonnes are metric; Mt = million tonnes; kt = thousand tonnes. (3) Totals may not sum exactly due to rounding.
